

PRECRISIS

PRotECTing public spaces thRough Integrated Smarter Innovative Security

PRECRISIS will **strengthen** the protection of public spaces by preventing terrorist attacks and violent crimes and mitigating their impacts.

PRECRISIS will **promote** integrated smarter innovative security through the empowerment of law enforcement authorities, first responders, local managers of public spaces and related security stakeholders, enhancing public-private cooperation.

PRECRISIS will **develop, test, and roll out** innovative, sustainable, and effective AI-based digital solutions and practical toolkits.

PRECRISIS Platform will provide identification of potential vulnerabilities connected to public spaces and a real-time simulation of plausible scenarios before, during and after terrorist attacks or severe violent incidents.

PRECRISIS Toolkit will deliver essential components for key stakeholders, providing the next generation of practical protective security tools for public spaces.

PRECRISIS Platform and Toolkit provide the essential system of collective measures needed to better protect public spaces from all manner of contemporary security hazards.

This project has received funding from the European Union's Internal Security Fund under grant agreement No. ISFP-2022-TFI-AG-PROTECT-02-101100539.
